Company Profile

Company Profile

About Mingtai Medical Group

Mingtai Group, was established in June 2000, focused on the R&D and manufacturing of operating room and ICU equipment. Our company has a close strategic partnership with German hydraulic HAWE systems and German Onda medical suspension system. With its ever-increasing innovation capabilities, outstanding flexible customization capabilities, and increasingly perfect delivery capabilities, Mingtai has won the trust and cooperation of global customers.

Mingtai products has passed those certifications of ISO13485, ISO9001, CE, FCC, SGS, etc. Mingtai company has a number of invention patents, utility model patents and design patents. Mingtai brand operating lamp, electric operating table, medical pendant, C arm X-ray machine, hospital bed and disinfection and sterilization equipment can meet the different needs of global distributors and end customers.

Phase 1: Creation and Exploration (2000——2005 year)

2000 year—Mingtai company was established. Production of ward nursing equipment

2002-2005 year: Company expanded, increased production area and personnel. Won the bid for foreign aid projects.

Phase 2: stable development, reserve strength (2006-2009 year)

2006-2009 year: Independent production of medical pendant. Passed ISO9001, ISO13485, CE certification. Develop high-definition camera surgery shadowless lamp.

Phase 3: Diversification of professional fields, leading domestically (2009-present)

2010-2018 year: Increase registered capital and expand production scale. Subdivided products to meet different needs. Mingtai has newly declared 36 patents and obtained FCC certification, SGS certification, and French BV certification.

Shandong Mingtai Medical Equipment Group Co., Ltd. was established, and all products have passed 14001 certification and RoHS certification. The German VINCENTE brand was launched.

The American Mingtai Group Holding Company was established, and high-precision advanced equipment such as large-scale laser cutting of German IPG system, automatic welding robot, and automatic CNC machining center were added.

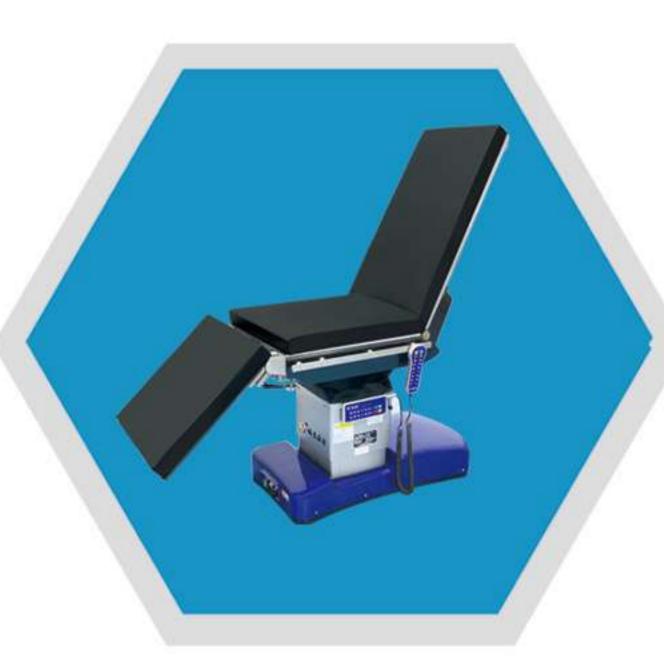

Phase 4: future prospects, rapid development, and occupying commanding heights of market

So far, the products of Mingtai Group have been sold to more than 90 countries and regions, and the products have been distributed in medical institutions all over the world.

German IPG system large laser cutting machine

Imported CNC system precision machining center

XAII the medical pendants, shadowless lamps, operating beds, electric hospital beds and other equipment produced by Mingtai company are self-produced except for standard parts, without external processing parts, which can better

control the production process.

center for the production of finished parts. Three-axis linkage, automatic tool change processing, high production accuracy, minimal differences between different batches, and can realize mixed assembly of different batches of processed parts, thereby ensuring the versatility of parts.

 The key shaft components of the medical pendant and shadowless lamp products produced by Mingtai company are all produced by CNC lathes. We have 8 CNC lathes of different models, which are specially used for the production of key shaft components.

%Laser automatic cutting and blanking, high product precision and high efficiency. Imported automatic welding robot with high welding strength and high standardization of product

Mingtai L8800 High-grade Medical Bridge Pendant

Stable bridge suspension system

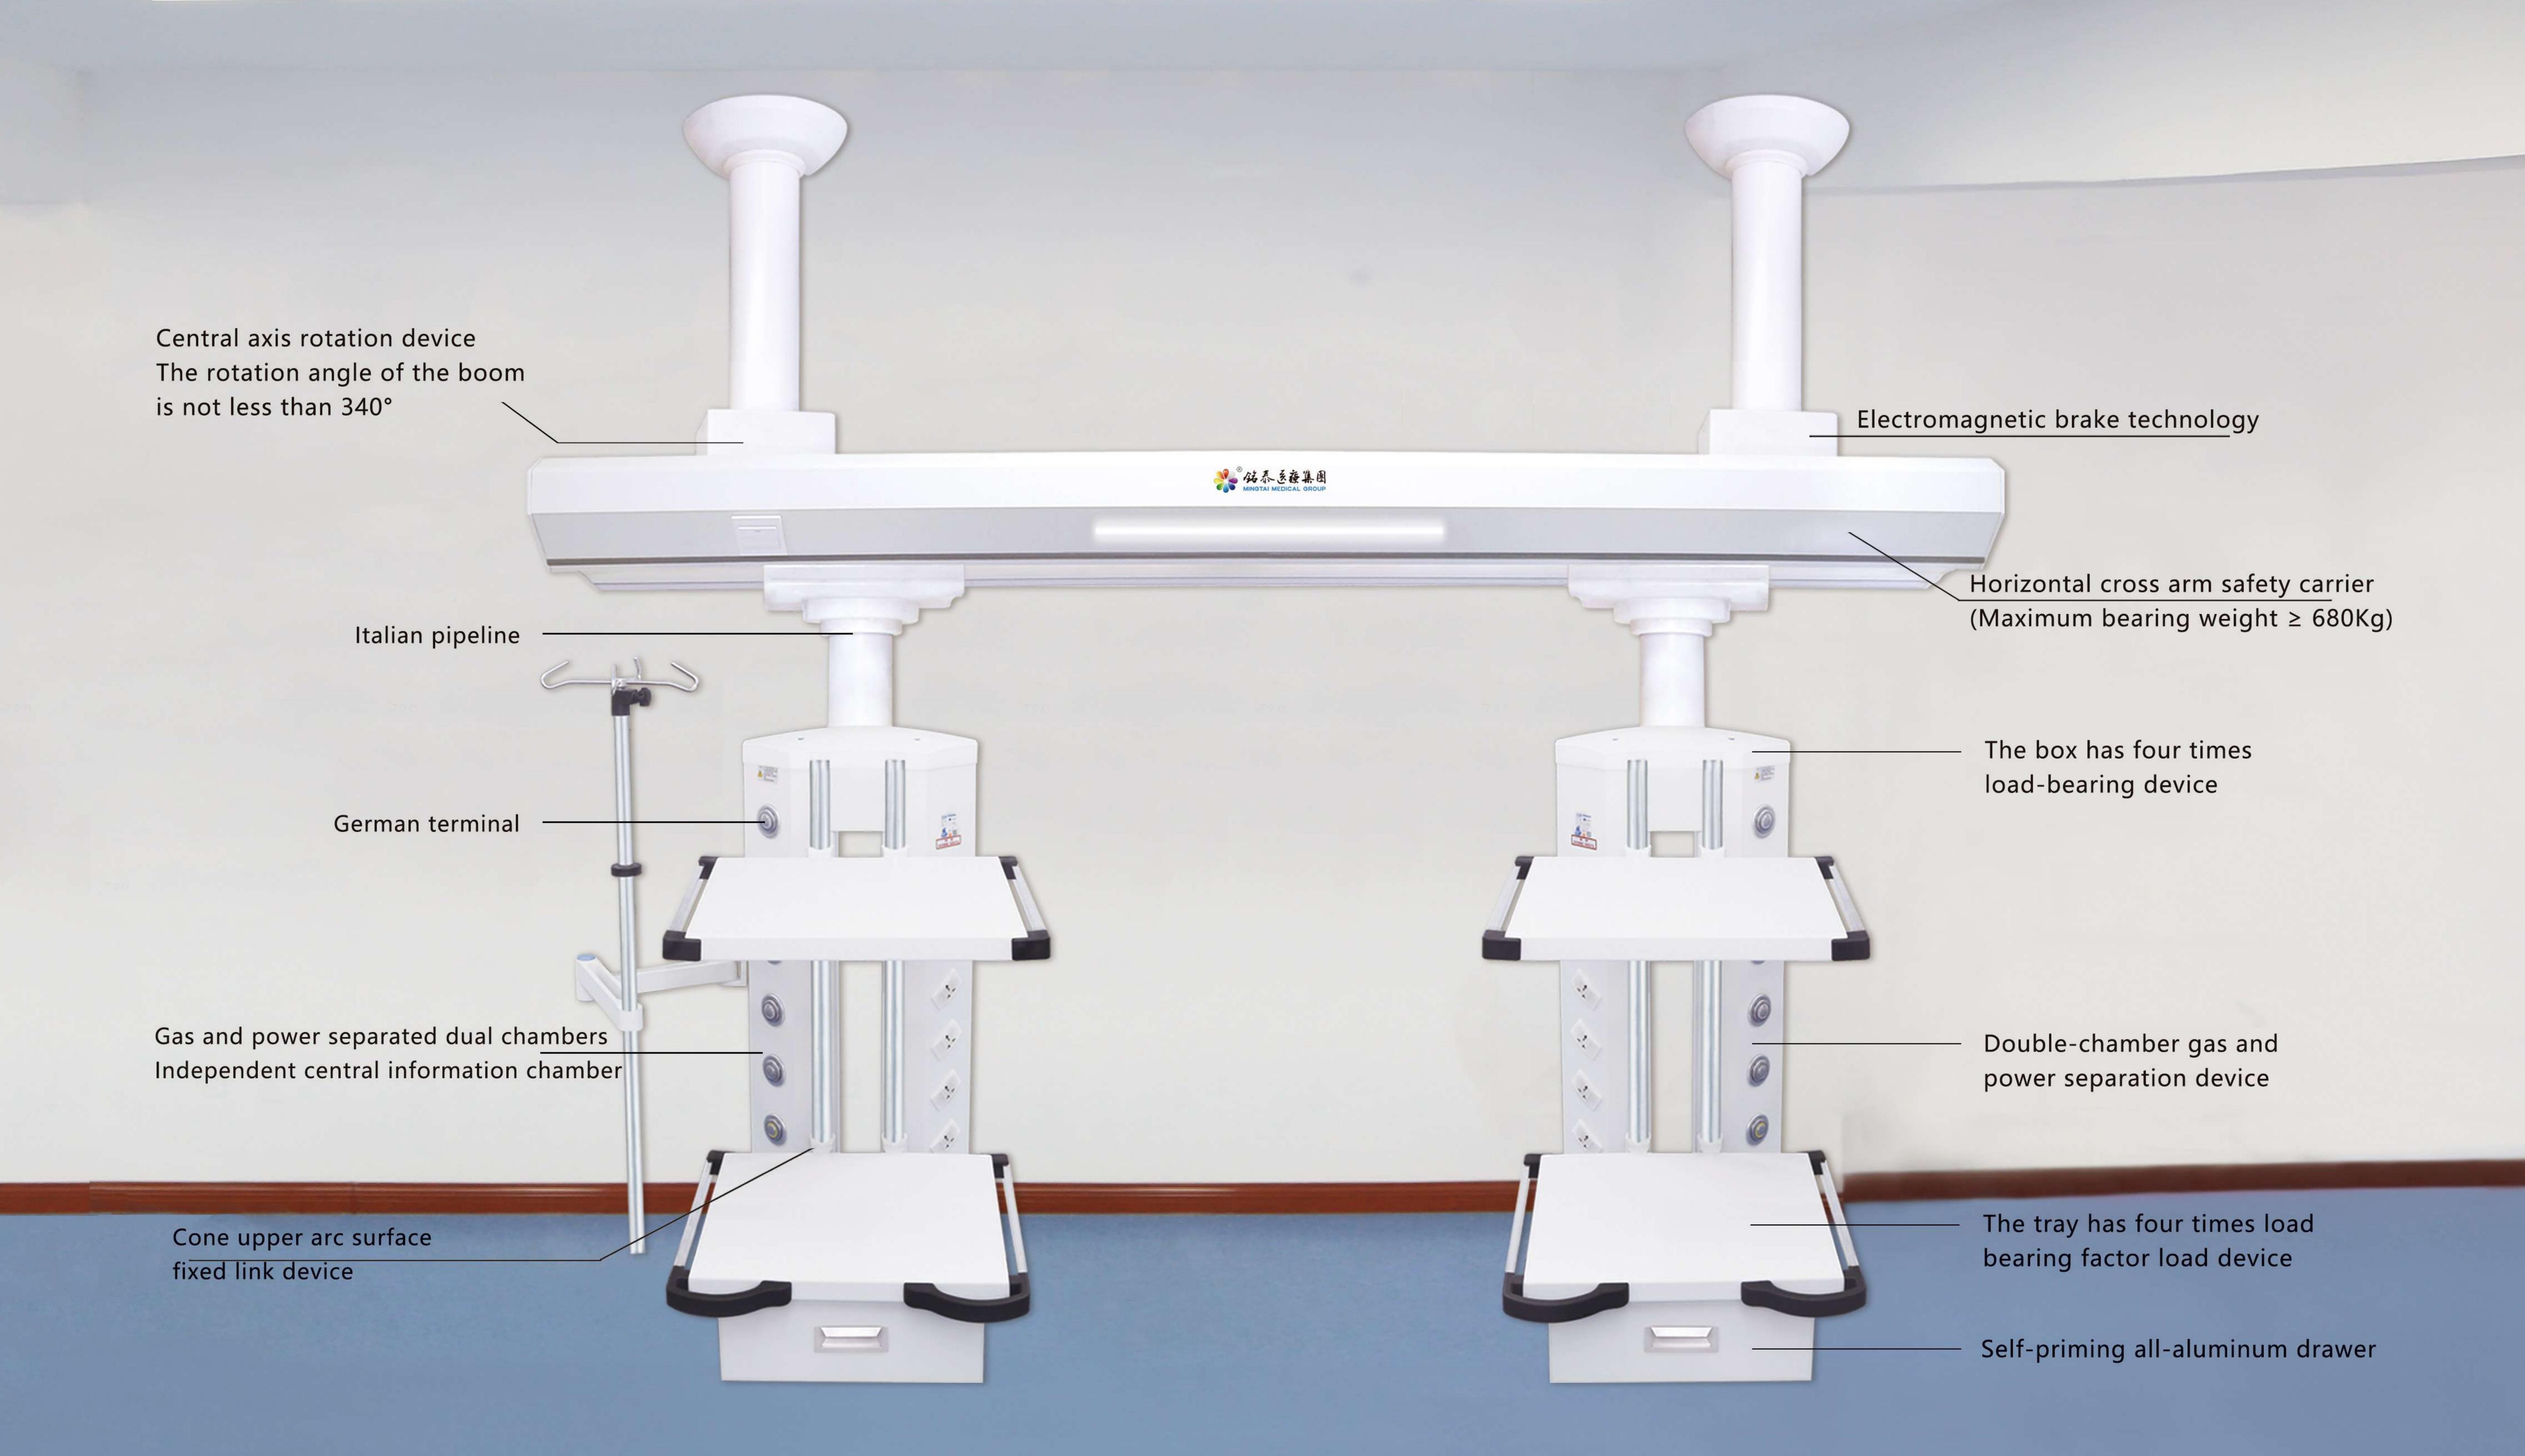

Mingtai ICU medical bridge pendant is specially designed for ICU intensive care unit, whole process monitoring and recovery room. It is made of aluminum alloy at one time and has high stability.

Dry and wet separation structure

Cables and pipelines are hidden in the system, dry and wet separation structure, wet section is equipped with flexible lifting infusion pump rack, dry section is equipped with adjustable medical monitoring instrument platform.

Flexible and diverse configuration

Various medical gases, strong and weak electricity, and network outputs are integrated on the console. The center of the bridge is equipped with lighting treatment lamps, and communication paging, monitoring, videophone, background music, and teaching and remote consultation systems can also be configured according to requirements.

This product is protected by the following patents:

No. 202120875511.3

No. 202121006069.7

No. 202121005878.6

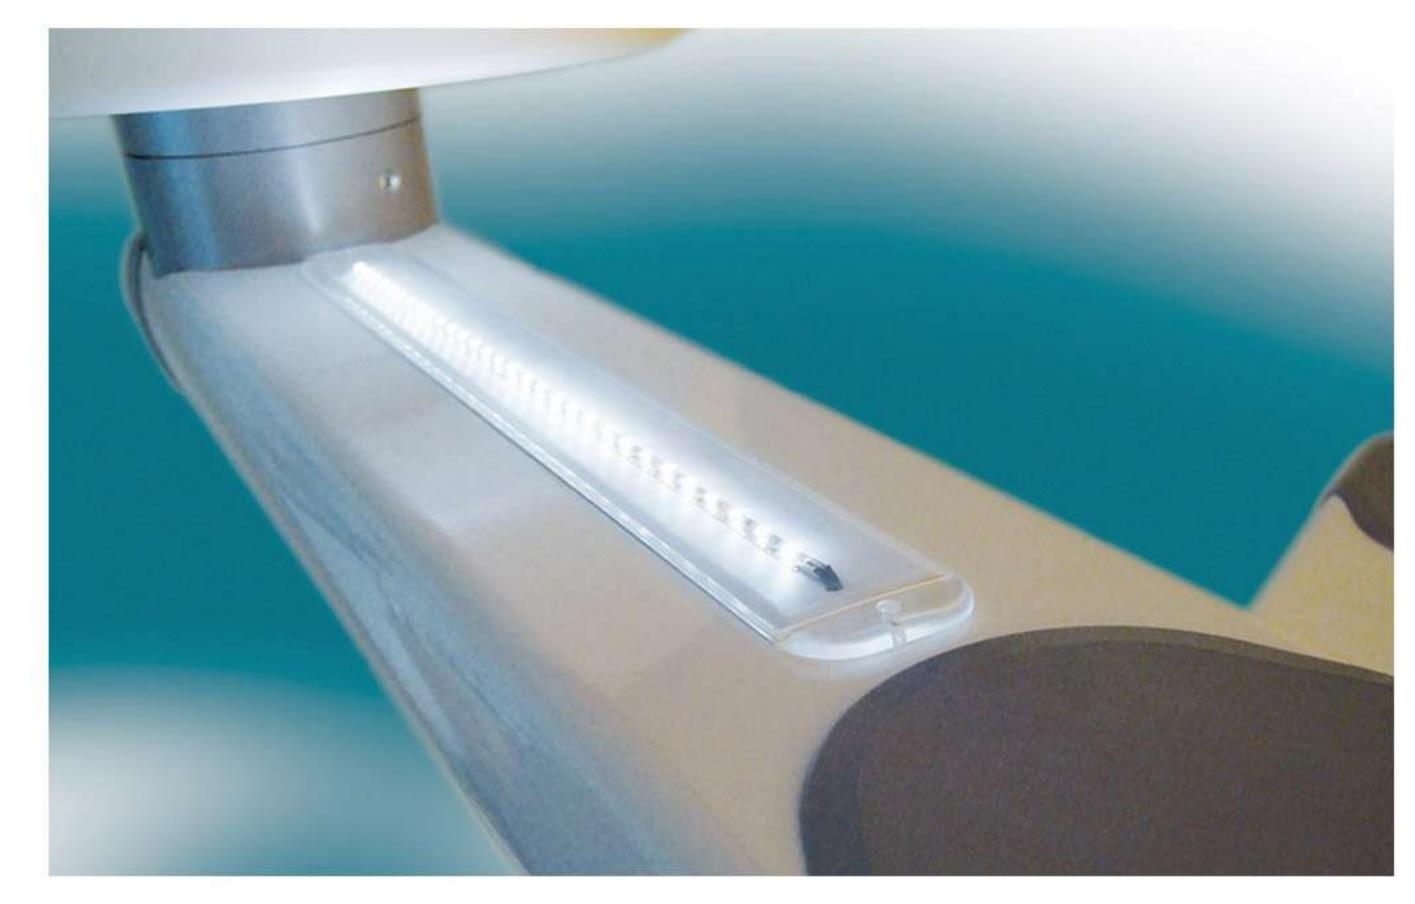

No. 202120876895.0

No. ZL201520533458.3

No. ZL201520533506.9

Multifunctional box

High-strength aluminum alloy platform, high-quality spray surface treatment and component seam closure design meet the hospital's requirements for hygiene and cleanliness. The platform can be flexibly added, moved or dismantled as required, and the height is adjustable. International standard gas terminals are used, and different gases are distinguished by different color codes to prevent mis-insertion

LED ambient light, safer and comfortable

LED ambient lights create a comfortable lighting environment and increase safety

Floor lighting system (optional)

Integrated at the bottom of the console, its dim LED light can be used as an indirect light source in the operating

Large internal wiring space

The large cross-arm section provides enough space for internal pipeline layout, which can accommodate more gas and electrical pipelines, fully meeting the wiring needs of the integrated operating room

Knuckle brake color indication

The color of the brake button corresponds to the color indicated by the joint LED light. When the joint is released, the LED indicator lights up automatically, which is convenient for locating the joint where the brake is released.

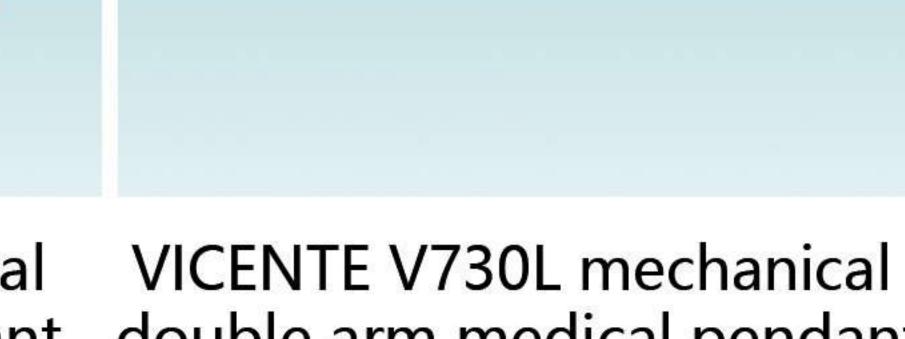

Audio system (optional)

Place the device in the console's expansion slot and operate it directly from the expansion slot or infrared remote; experience great sound through the built-in speakers or external

Mingtai M9 Intelligent Model Electric Hospital Bed

Optional weighing function
Optional back plate X-ray
transmission function

Advantage

- With bedside photography function and lateral tilt function
- Stable, flexible and durable, suitable for various clinical environment needs
- Safe load-bearing, high protection level, the bed body has a large adjustment range, low ground clearance, high safety
- The bedside is divided into four parts, each part can be electrically adjusted and its angle can be adjusted with scale display
